

What is Nuxt?

- Free and open-source framework
- Create full-stack web applications and websites
- Vue.js + New Features = Nuxt.js
- Make application with `.vue` files
- HMR (Hot Module Replacement) in development
- Performant application in production with server-side rendering

Automation and Conventions

- File-based routing
- Code splitting
- Server-side rendering
- Auto-imports
- Data-fetching utilities
- Zero-config TypeScript support
- Configured build tools

Server-Side Rendering

- Faster initial page load time
- Improved SEO
- Better performance on low-powered devices
- Better accessibility
- Easier caching
- Ability to disable SSR (Server-Side Rendering)
- Use Nitro as a server engine
