

Vue.js Development

- Nuxt adds features :
 - ◆ Component auto-imports
 - ◆ File-based routing
 - ◆ Composables for an SSR-friendly usage
- Nuxt has been built on top of Vue because :
 - ◆ The reactivity model of Vue
 - ◆ The component-based templating
 - ◆ Scalability (small projects to large web applications)

Vue with Nuxt Features

- Single File Components (SFC or .vue files)
 - ◆ Markup <template>
 - ◆ Logic <script>
 - ◆ Styling <style>
- Auto-imports components (📁 components/)
- Vue Router (📁 pages/)

Differences with Nuxt 2 / Vue 2

- Faster Rendering
- Smaller Bundle
- Composition API
- TypeScript Support
